MARCH SAW a halt in IPOs owing to market volatility. But, a subsequent Nifty recovery and increased qualified institutional placement (QIP) launches, particularly by public sector banks, indicate growing confidence, *Mint* reported. March saw seven QIPs, with banks such as Indian Overseas Bank and Bank of Maharashtra raising funds to meet shareholding norms. Analysts said IPOs could see a revival if this bullish trend continued as QIPs and IPOs move in tandem and surge in bullish phases.
